

# Data Analysis: True Insight

Powered by ACL™ Analytics

## Dig In To The Data

Do you have the right tool to discover the truth hidden in your data? Performing in-depth analysis of big data does not need to be an unwieldy and time-consuming exercise. Quickly find exceptions and control breakdowns that leave you exposed to financial and reputational risk—increasing coverage and decreasing the time it takes to unlock the truth in your transactions can be easy.

The Data Analysis solution, powered by ACL Analytics, enables Audit, Risk, Compliance, IT or Financial Control professionals to analyze data from almost any source and see results from the convenience of the desktop.

“ACL gives us a competitive edge – and allows our company to audit millions of records to ensure each client’s assets are being managed and protected to our Investors Group standard.”

Brad Kirk, Manager of Internal Audits, Investors Group Inc.

## Benefits

- Easily analyze any data source
- Analyze 100% of your data
- Leverage hundreds of data analysis commands and functions
- Automatically generate a project log of every analytic step and results
- Instantly share, collaborate and remediate on all analytic exceptions\*

\*Please note: This requires a subscription to ACL™ GRC

ACL technology has a proven track record over 25 years of helping professionals uncover control failures and saving their organizations hundreds of millions in lost revenue.

- **Easily access any data source:** Analyze virtually any data that your organization stores, including ODBC-compliant databases, Microsoft™ Excel, Access, PDF and XML files. This makes it easy to analyze disparate data sources all on one platform.
- **Analyze 100% of entire data populations:** ACL Analytics rapidly processes data, no matter the size, ensuring that no data point is missed. This will give your organization the assurance that each and every transaction is checked and accounted for.
- **Leverage hundreds of built-in data analysis commands and tools:** Join and match data across different sources. Identify duplicate and near-duplicate data records with Fuzzy Duplicates analysis and leverage ACL’s

easy-to-use scripting language to build analytic tests. These are just some of many features that enable professionals to investigate and find instances of control failures.

- **Automatically record every analytic step:** ACL Project Log records every analytic step which can be saved to easily repeat the same analysis. This provides an analytic trail that serves as evidence of the work that has already been performed and also saves time from having to manually recreate the same analytic tests.

## Data-Driven Decision Making

Did you know that ACL Analytics is tightly integrated with ACL GRC? Remove the barriers between data and decision making and turn analysis into fact-based action. Share and manage results, drive timely remediation activities and track outcomes.

ACL GRC

ACL Analytics

"ACL is an extremely adaptable tool. The more you learn about it, the more capable it becomes. It just gets better and better with extended use."

— **Steven Jung**  
Director of Internal Audit  
Stanford University

## Technical Specifications

### Supported operating systems:

- Microsoft Windows® 7 (32-bit and 64-bit)
- Microsoft Windows Vista Ultimate Edition (SP1)
- Microsoft Windows XP (SP3)

### Requirements

- 1.8 GHz or higher processor
- 1 GB of RAM
- 150 MB of hard disk space for application components
- Significant additional disk space (100 GB or more recommended) if a computer will be used to store data extracts, flat files and results
- TCP/IP connectivity during installation
- Internet Explorer 7, or higher

## About ACL

ACL delivers technology solutions that are transforming audit and risk management. Through a combination of software and expert content, ACL enables powerful internal controls that identify and mitigate risk, protect profits, and accelerate performance.

Driven by a desire to expand the horizons of audit and risk management so they can deliver greater strategic business value, we develop and advocate technology that strengthens results, simplifies adoption, and improves usability. ACL's integrated family of products—including our cloud-based governance, risk and compliance (GRC) solution and flagship data analytics products—combine all vital components of audit and risk, and are used seamlessly at all levels of the organization, from the C-suite to front line audit and risk professionals and the business managers they interface with. Enhanced reporting and dashboards provide transparency and business context that allows organizations to focus on what matters.

And, thanks to 25 years of experience and our consultative approach, we ensure fast, effective implementation, so customers realize concrete business results fast at low risk. Our actively engaged community of more than 14,000 customers around the globe—including 89% of the Fortune 500—tells our story best.
